

KnockOut 2

In KnockOut 2, you can revert an image to an earlier state. This lets you discard unwanted changes and start afresh. If you have not saved the image you are working on, KnockOut 2 will recall the original image from the host application.

To revert to an earlier version of an image

- 1 Click **File** ▶ **Revert**.

- 2 Click **OK** to revert to the earlier or original state.

Note

You cannot undo a reverted image.
