

### Quick Start Guide for Converting Video to Mobile Devices

Corel<sup>®</sup> DVD Copy<sup>™</sup> is a powerful tool for converting video files into a wide variety of standard and high-definition formats. This Quick Start Guide will show you how to convert your videos for playback on popular cell phones, PDAs, and smart devices.

#### Convert videos in 3 easy steps!

Open DVD Copy<sup>TM</sup> 6, click **Convert File**. Select **Convert to CellPhone**, **Convert to iPhone**<sup>TM</sup>, or **Convert to iPod**<sup>®</sup>, depending on your output device.

#### Step 1: Add source

Add the video files that you want to convert. To do this, click the 💽 Add video from local button.

The **Add Video File** dialog box appears. Locate and select your video files and then click **Open**. Thumbnails of your videos are added in **Source**.

#### Step 2: Choose target

In **Target**, click Browse Target to select the location where your video will be copied.

#### Step 3: Set output quality

In **Profile**, click the down arrow to select the format/bitrate/screen resolution to set the quality of your video.

| 3 Profile | 3GPP2 /128kbps/128x96 - Standard Quality  |   |
|-----------|---|---|
|           | 3GPP /128kbps/128x96 - Standard Quality   | _ |
|           | 3GPP /128kbps/176x144 - Standard Quality  |   |
|           | 3GPP /256kbps/320x240 - Medium Quality    |   |
| 28234 MB  | 3GPP /376kbps/640x480 - High Quality      |   |
|           | 3GPP2 /128kbps/128x96 - Standard Quality  |   |
|           | 3GPP2 /128kbps/176x144 - Standard Quality |   |
|           | 3GPP2 /256kbps/320x240 - Medium Quality   |   |
|           | 3GPP2 /376kbps/640x480 - High Quality     |   |

Click Start Copying

to start converting the video.

### Converting to iPod touch<sup>™</sup>, iPhone<sup>™</sup> and iPod nano<sup>®</sup>

Here is how to convert video to **iPod touch**<sup>TM</sup>, **iPhone**<sup>TM</sup>, and **iPod nano**<sup>®</sup> supported formats and transfer them to your device using **iTunes**<sup>®</sup>.

Follow the 3 easy steps...

For **iPod touch**<sup>TM</sup> and **iPhone**<sup>TM</sup>, select **Convert to iPhone**<sup>TM</sup>. For **iPod nano**<sup>®</sup>, select **Convert to iPod**<sup>®</sup> and set the location in your local drive where your video will be copied.

## To transfer converted video to iPod touch<sup>™</sup>, iPhone<sup>™</sup>, or iPod nano<sup>®</sup>:

- 1. Connect your device to your computer.
- 2. Run **iTunes**<sup>®</sup> version 7 or above.
- Import the converted files from your Target location to iTunes<sup>®</sup> and transfer them to your iPod touch<sup>™</sup>, iPhone<sup>™</sup>, or iPod nano<sup>®</sup>.

#### **Converting to Windows Mobile® devices**

When converting to **Windows Mobile**<sup>®</sup> devices, select **Convert to Zune**<sup>™</sup> and choose the following formats: WMV 320x240 for 4:3 video and 320x176 for 16:9 video. Use **Microsoft**<sup>®</sup> **ActiveSync**<sup>®</sup> to add the video to the device.

| ė     | 📁 Black   | Berry     |         |       |           |     |          |
|       | 📁 r       | nusic     |         |       |           |     |          |
|       | 🍋 F       | oictures  |         |       |           |     |          |
|       | 📁 r       | ingtones  |         |       |           |     |          |
|       | 2 5       | system    |         |       |           |     |          |
|       | ÷>        | /ideos    |         |       |           |     |          |
|       | 2) Dichie | nnarv     |         |       |           |     | <b>T</b> |
| 4     |           |           |         |       |           |     | ►        |

Follow the 3 easy steps...

For BlackBerry<sup>®</sup>, select **Convert to CellPhone**. Since BlackBerry<sup>®</sup> also supports playback of MPEG4, you can also select other devices that support MPEG4 (Profile) as your output device.

You can then use the **BlackBerry<sup>®</sup> Desktop** Manager\Media Manager to add your target video to the BlackBerry<sup>®</sup> Device Memory or Media Card.

#### Converting to Palm<sup>®</sup> Treo<sup>™</sup>

Here is how to convert video for viewing in your Treo<sup>TM</sup>:

| ^ | Name              | Туре                |
|---|-------------------|---------------------|
|   | Hard Disk Drives  |                     |
|   | Second Disk (C:)  | Local Disk          |
|   | Mew Volume (E:)   | Local Disk          |
| Ξ | Devices with Remo | wable Storage       |
|   | 4:)               | 3½-Inch Floppy Disk |
|   | DVD Drive (D:)    | CD Drive            |
|   | SD MMC (F:)       | Removable Disk      |
|   | Other             |                     |
|   | Uther             |                     |

Before you begin, insert your Treo<sup>™</sup> memory card into a card reader and plug it into a USB port on your PC. Your card will be detected as a removable drive.

Follow the 3 easy steps...

For Treo<sup>TM</sup>, select **Convert to CellPhone** and set your Treo<sup>TM</sup> memory card as the target location.
