

Ulead® DVD MovieFactory® 6

The Easy Way to Create Video and Slideshow Discs

Ulead® DVD MovieFactory® 6 is easy-to-use disc authoring and burning software that lets you do more with your digital media. Create DVDs with studio-quality personalized menus. Use the new Video Editing Wizard to add polish to your videos, with titles, music and effects. Preserve your precious memories and share with family and friends.

What's New

Add Spice to Your Videos with New Editing Tools

It's easy to polish your camcorder footage for a more professional look. Apply theme templates that do the work for you, or use the simple tools to trim your video, and add titles, transition effects and even a sound track.

Exciting Theme Templates

- **One-click Theme Templates** – instantly add professional style to your videos.
- **Variety of styles** - choose from a style or theme to suit your video, such as Wedding, Travel or Sports.
- **Simply select a template**, and watch MovieFactory create a sophisticated opening sequence with multiple animated overlays, using clips from your video. It also adds music and appropriate titles for you.
- **Easy to customize** - use a template as is, perhaps just changing the opening titles or music, or use the timeline editing tools to personalize as much as you like.

Easy Video and Slideshow Editing in the "Edit Room"

- **Storyboard Mode** gives you an overall view of your production, making it easy to rearrange clips for a better flow.
- **Timeline Mode** gives you more control over the positioning and length of titles, background music and overlays.
- **Customizable Pan & Zoom** – when creating slideshows, precisely control paths and zoom ratios to highlight picture details.
- Add **DVD chapter points** directly on the timeline, so your viewer can skip between sections.
- **Step-by-Step Video Editing** – all the tools you need are now grouped together:
 - **Trim** your video to make it shorter, and rearrange clips as needed.
 - **Auto-enhance video** with one click – fixes most common brightness and contrast problems.
 - **Add video clips and photos** to create mixed-media video and slideshows.
 - Drag and drop cool **transition effects** such as dissolves or wipes between your video clips for a smoother viewing experience.
 - **Add titles** to suit your production. Title size, position and style can be modified on-screen.
 - Change **background music** if you like, adding your favorite music.
 - Add **voiceover narration** to introduce your video.
- **Automatically adjust for 16:9 PC monitors** – make full use of all that extra screen space if you are using a widescreen monitor.

More Sophisticated Menu Design

Creative menus are at the heart of MovieFactory. Templates with cool motion effects make it a snap to produce discs that look every bit as good as Hollywood DVDs.

- **Button Moving Paths** – animated titles, navigation buttons, and decorative objects make menus come to life.
- **Distort Menu Objects** – rotate, stretch and angle menu motion buttons to fit into frames or other background elements for a truly personal touch.

Any Camcorder, any File Format

No matter what format your camcorder, or where you get your video clips from, MovieFactory has you covered for the latest in cutting-edge formats.

- **AVCHD Camcorder Support** – import and edit High-Definition footage from your AVCHD camcorder, either from disc or hard drive.
- **Auto Subtitle Track** – automatically capture video file name, date, time, and EXIF (photo) data and view as a subtitle track. Great for keeping track of when and where you shot your video and pictures.
- **DivX Decode** – Easily convert your DivX movies to DVD, adding .srt files as subtitles.
