

Create a 12 x 12 Scrapbook Page

Creating a beautiful scrapbook album isn't a big project with Paint Shop Photo Album! We'll show you how easy it is to drag your photos into a template, add your own journaling, and print a beautiful page.

What you'll need:

- A collection of digital photos
- Jasc® Paint Shop™ Photo Album™ 5
- A printer
- 12 x 12 photo quality paper

When you complete this tutorial you'll be able to:

- Select the Album Page project
- Choose a layout and page style
- Drag photos into cells
- Enter and edit text
- Save your Album Page
- Print your Album Page

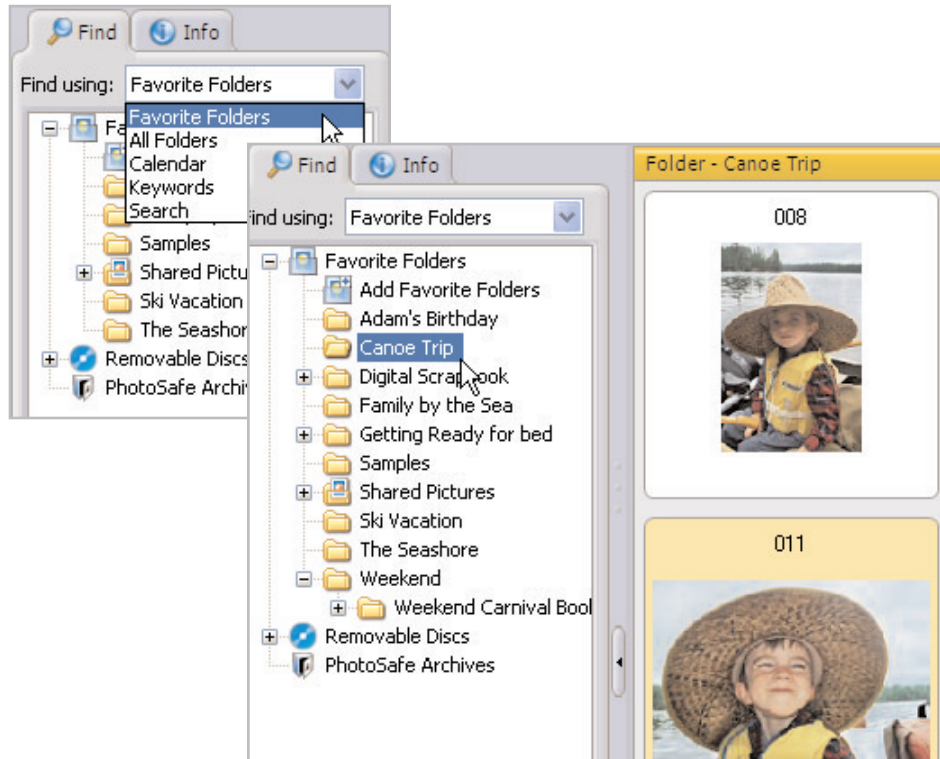

Select Your Project

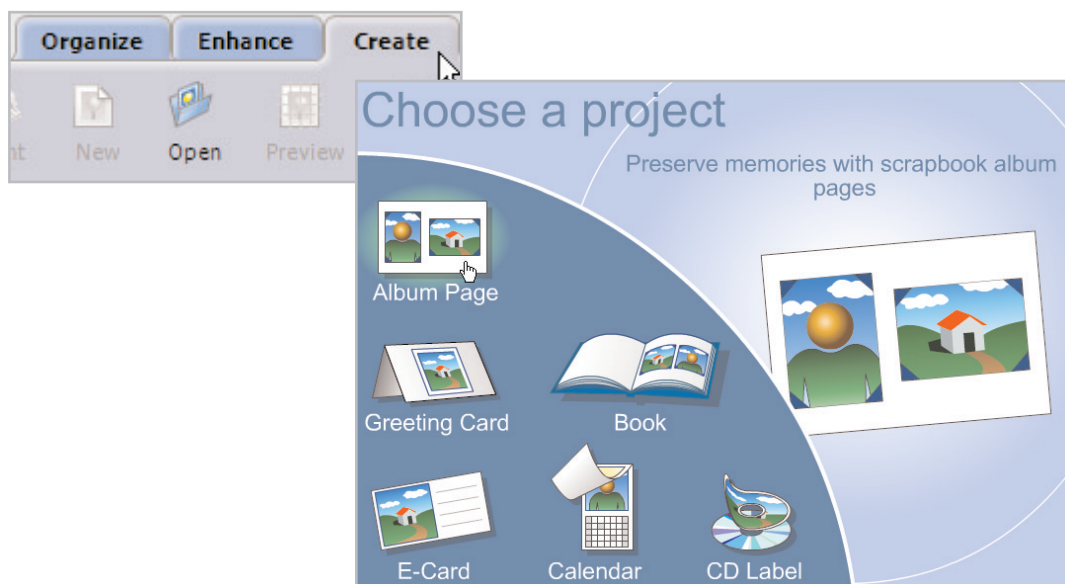

1. Choose **Start > Programs > Jasc Software > Jasc Paint Shop Photo Album** or double click the Paint Shop Photo Album icon on your desktop to open Photo Album.

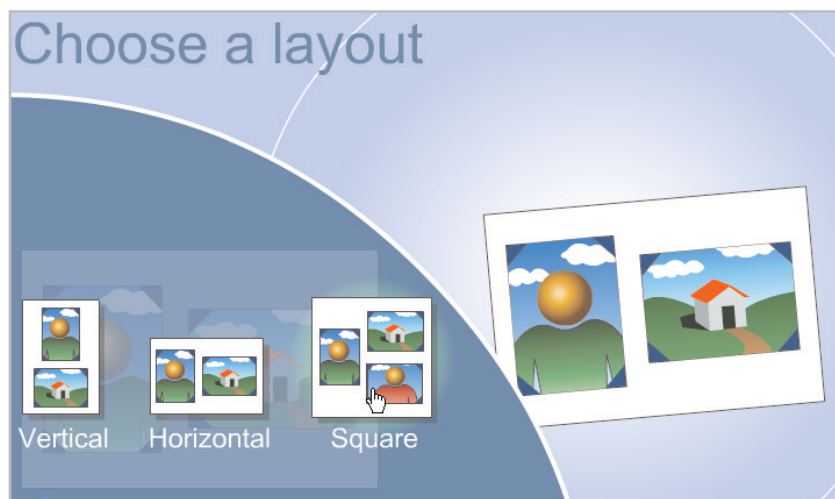

2. Click the **Find** tab to open the folder containing the photos you want to use on your album page. Once you find the photos you want to use, select the folder.

3. Now, click the **Create** tab to display the available projects. On the Project Screen, click **Album Page**.

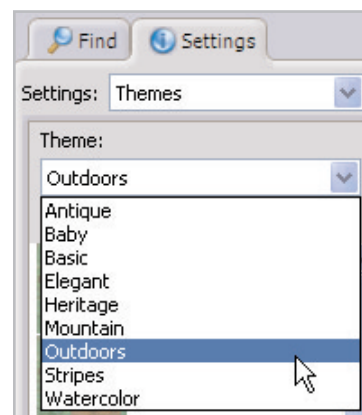

4. On the next screen, you choose your page layout. For this example, click **Square**.

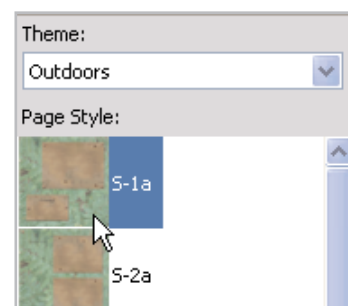

Choose Your Theme and Page Style

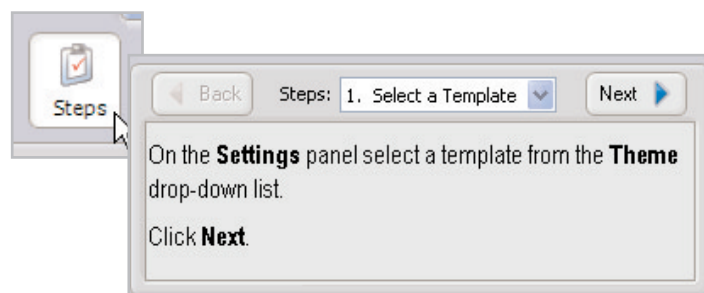

5. On the Settings panel, from the Theme drop-down choose a look for your scrapbook page. For this tutorial, we choose **Outdoors**, but you can choose whichever theme you like.

6. Now, in the Page Style section, select a style for your page. For this example, we're using **S-1a**, but you can choose whichever one you like. When choosing a Page Style, be sure the cells match up with the orientation of your photos, either landscape or portrait.

Tip: You can use the Steps panel to view instructions about creating your Album Page, just click the **Steps** button on the toolbar to turn the Steps panel on or off.

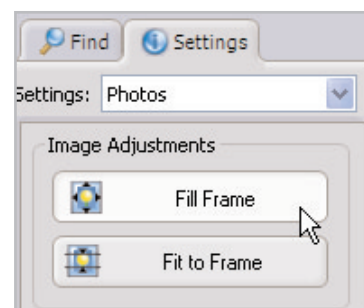

Add Photos

- From the Image Strip, click and drag a photo into the cell of your page. If you make a mistake, you can remove a photo from a cell, by simply dragging another photo into the cell.

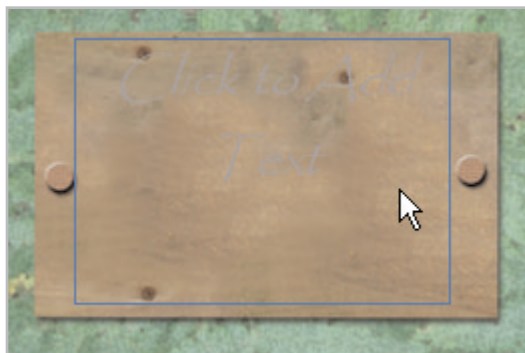

- Use the Image Adjustments on the Settings panel to make sure the photo you've chosen fits the page just the way you'd like it to.

- Click **Fill Frame** to enlarge the photo to fill the cell. Some parts of the photo may be cropped.
- Click **Fit to Frame** to resize the photo so that the entire photo appears in the cell. There may be some white space around the photo if it's a different size than the cell.

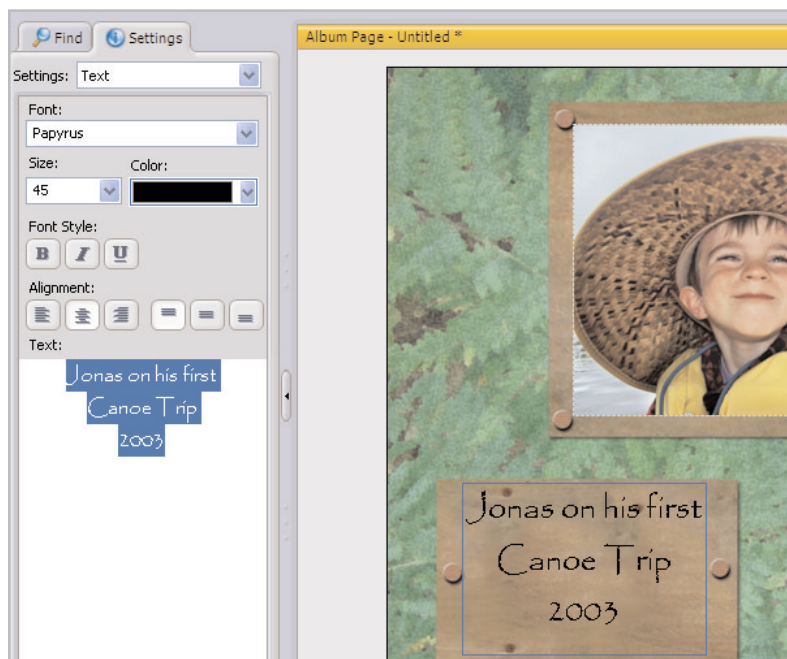

Add Journaling

9. Click the text cell to add a journaling to your page.

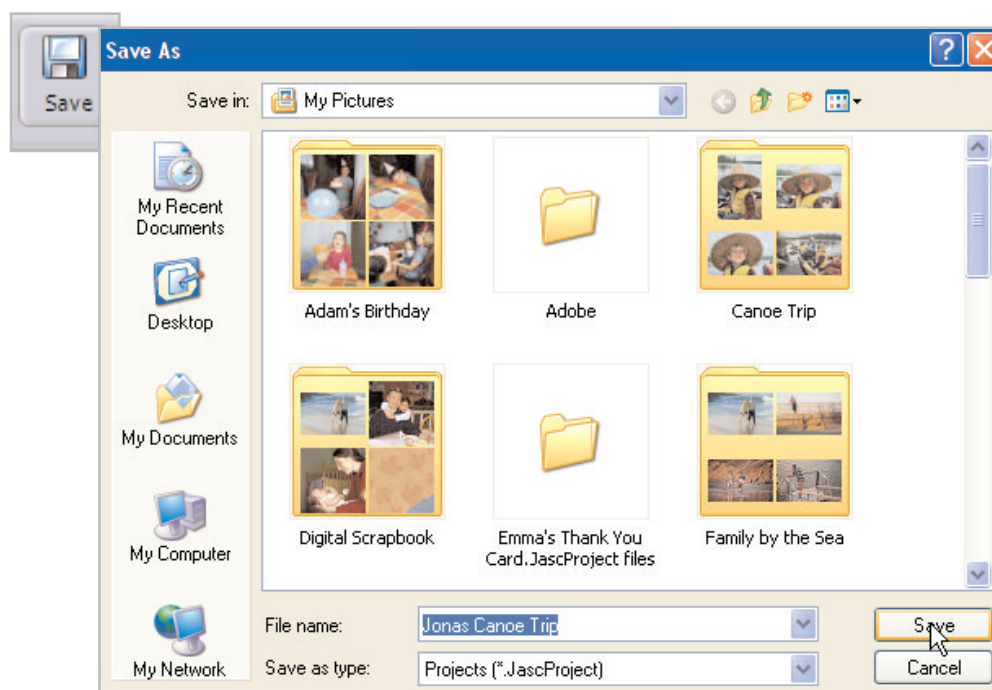

10. On the Settings Panel you can choose the Font, Size, Color, Style, and Alignment for your journaling. Once you adjust the settings to your liking, enter your journaling in the text field at the bottom of the Settings panel. The text you enter here will appear on your page on the right.

Tip: To get a better idea of how the page will look when printed, click the Preview button to turn off the cell borders.

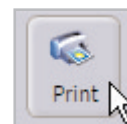

Save Your Work

11. To save your page, click **Save**. Enter a name for your project in the File Name field. The page will be saved in the Jasc Project File (.JascProject) format. When you're done, click **Save**.

Print Your Album Page

12. To print your page, click the **Print** button. To get a high quality print out, click the **Properties** button, select the type of paper, and adjust the print quality settings to the highest setting possible.

Next Steps:

This is only the beginning. Now that you know how to make an album pages, you can create beautiful scrapbooks in a matter of minutes.
