

With Corel[®] Photo Album[™] you can you can print your own prints right at home, while saving both time and money. All you'll need is some photo quality paper and a photo quality printer!

What you'll need:

- a digital photo
- a photo quality printer
- photo quality paper
- Corel Photo Album

When you complete this tutorial, you'll be able to

- configure your printer settings
- print a photo

To print photos using Quick Print

1 Click the Find tab, and open the folder that contains the photo you want to print.

2 Press the Ctrl key and Select the photo or photos that you want to print.

Xmr.

Corel Photo Album automatically detects your default printer, paper, and ink settings. You should configure your printer settings when you have more than one printer, when you want Corel Photo Album to use different settings when printing photos, or if you install a new photo printer.

The selections that you make are remembered by the program and do not affect the default print settings of your system. This is especially useful if you always use the same printer and the same type of paper each time that you print.

3 If you need to configure your printer settings, click the Quick Print Quick Print button to open the Quick Print window.
