GeeGuides - Art Teaching Art

www.geeguides.com/partners/corel/promo

At GeeGuides, we are passionate about giving students the tools they need to understand, interpret, and enjoy art. GeeGuides provides parents and teachers with a Web-based, interactive art education system that automatically assesses a student's progress, and establishes an ongoing portfolio.

The student is introduced to fundamental art principles, discovers meaning and interpretation, and explores self-expression. Each lesson begins with a fun, animated movie, followed by interactivities designed to help strengthen the student's understanding of the concepts presented. The student's successful completion of these activities is rewarded with advancement to new content, which allows GeeGuides to track learning growth and provide customized achievement reports.

Our animated characters excel at making abstract, challenging subjects understandable, so that students are able to make personal connections to both the characters and the ideas being presented. We think it's vital to engage students emotionally as well as cognitively, and research has demonstrated that this technique greatly enhances knowledge retention.

Art education is extremely important. It helps students develop critical thinking skills, as well as to develop their sense of self through creative self-expression. Most importantly, GeeGuides accomplishes this by making learning fun.

GeeGuides Painter Essentials 3 Lessons for Students

GeeGuides Painter Essentials 3 Lessons is a Web-based, interactive art education program. It provides the tools students need to understand, interpret and enjoy art, and fosters critical thinking. In addition, GeeGuides keeps track of students' learning growth and provides customized achievement reports. GeeGuides makes art education fun!

Welcome to GeeGuides!

Are you ready for our arctic family that includes a polar bear named Furnace, his good pal Tickle the penguin, and her big sister Ruby — not to mention us heavily-bundled human-types — to lead you on an exciting expedition through the wonderful world of art?

GeeGuides can take you there through its art education program for children. It is a unique interactive, web-based, comprehensive way for children to study art and learn how to apply its concepts to real life. So, strap on your snowshoes — and don't forget to grab a jacket and some gloves — as you prepare to embark on an incredible journey in art creation and understanding.

All of us here at GeeGuides — whether furry, feathered or just freezing — recognize that art is an essential component of a comprehensive education. Numerous studies confirm that art is essential to a child's development, helping to open doors to history and culture, science and math, and many other aspects of the child's social and intellectual growth.

Through some rather intense research and work, we developed a thoroughly enjoyable, unique way of learning about art. Not only do we comply with national and state art curriculum standards, we incorporate the latest and greatest in pedagogical theories.

Peda-what? Pedagogical... Yes, we had to ask too. It means that we help teach kids to think for

themselves and problem-solve — and, as a wonderful by-product, love to learn. Your computer will be put to very good use.

Please join Furnace, Tickles and Ruby on a very special tour of GeeGuides. We bet you'll find yourself exclaiming "gee!" at this unique art education tool.
