** Corel WordPerfect Office X3 will open the vast majority of files created in Microsoft Word, Excel and PowerPoint. Due to differences in the applications, on occasion a file may not open and, in some cases, formatting may not be identical. PDF editing features in WordPerfect X3 enable users to open, edit and reuse the content of most PDFs within the familiar environment of a word processor. Upon import, some formatting changes may occur, depending on the content in the PDF file and the application that created the source PDF file. Text that is part of a bitmap image within the PDF may require additional Optical Character Recognition (OCR) tools to convert the image to editable text.

† After mail-in rebate. Prices may vary.
