

Ottawa, ON, Canada - April 2, 2009

With million of users worldwide, the CorelDRAW[®] family of products offers a wide range of solutions. From trusted creative & production-ready graphics with CorelDRAW Graphics Suite, to precise technical illustration with Corel DESIGNER[®] Technical Suite, the CorelDRAW family of products continues to provide market leading solutions around the world for many industries including advertising, sign-making, engraving, screen printing, and direct-to-garment (DTG).

Corel Corporation proudly selected Wilcom International Pty Ltd as its premier CorelDRAW Strategic Partner in the embroidery and multi-decoration industries. Through the combination of graphics expertise from Corel and industry-leading embroidery technology from Wilcom, products such as Wilcom DecoStudio[®] and Wilcom EmbroideryStudio[®] continue to redefine what's possible in graphic design for the multi-decoration industry.

CorelDRAW[®]
STRATEGIC PARTNER

About the CorelDRAW Strategic Partner Program

Through an open software development kit integrated with every license of CorelDRAW Graphics Suite and Corel DESIGNER Technical Suite, independent software vendors can take advantage of an advanced graphics engine/platform to build custom solutions. Ranging from simple macros to automate repetitive tasks to advanced solutions for specific industries, the CorelDRAW Graphics Engine is available for everyone to customize.

While we recognize the power of having an open Application Programmers Interface (API) with all of our products, we also work closely with a selected number of independent software vendors in specific industries to deliver unique solutions to the market. These companies are part of the CorelDRAW Strategic Partner Program.

We are pleased to work with Wilcom as part of this distinguished program. To learn more about the CorelDRAW Strategic Partner program and/or the Corel/Wilcom relationship, please contact Corel Corporation at coreldrawsdk@corel.com.
