

## AfterShot Pro 3: Save Time, Get Better Photos

*New Highlight Recovery Algorithm, Time-Saving Tools, 4x Faster Than Leading Competitor;  
Spend More Time with Your Camera, Not Your Computer*

**OTTAWA, CANADA – May 11, 2016** – Corel today announced the release of [AfterShot™ Pro 3](#). Building on its strength as the industry's fastest photo editing and organization software, AfterShot Pro 3 adds an all-new Highlight Recovery algorithm, comprehensive Watermarking, layer-based Blemish Correction, as well as dynamic update abilities that enable new camera RAW profiles to be supported faster than ever.

Photographers dream of capturing that perfect shot, but spending all day importing, cataloging, editing, and then exporting a memory card full of images can really take the fun out of a photo workflow. For the professional, time is money. And for enthusiasts, time is just as precious.

"Collectively, we're now capturing trillions of photos each year. Photographers need a simpler and more agile way to manage and edit their photos," said Greg Wood, Senior Director of Photo Products at Corel.

"AfterShot Pro 3 is a faster and more affordable solution for photographers looking for high quality results. It doesn't lock you into catalogs or a subscription and is focused on photographers' common need: great images in less time."

From its inception, AfterShot Pro has been built to deliver on three core competencies: outstanding performance, superior productivity, and freedom of choice. It enables photographers to organize thousands, cull from hundreds, and perfect a single photo. AfterShot Pro 3 provides easy access to a variety of plug-ins and add-ons direct from the community. In Corel lab testing, it [remains up to 4x faster than Adobe Lightroom CC 2015.5 at batch exporting](#).

"There are all kinds of great reasons photographers should test out AfterShot Pro 3," added Wood. "Not only is it free to try; but, fundamentally, its speed, dynamic update abilities, and powerful feature set make it a truly enjoyable way to work with and manage your photos."

### What's New in AfterShot Pro 3

Building on its reputation as the industry's fastest photo editor, AfterShot Pro 3 adds new and enhanced features to deliver a complete professional-level photo workflow and management experience.

**NEW! Highlight Recovery Algorithm:** With an all-new algorithm under the hood, the enhanced Highlight Recovery Range slider now rescues more detail and tones from overexposed RAW images, delivering superior image quality.

**NEW! Comprehensive Watermarking:** Protect your photos online and promote your work with advanced watermarking abilities. Apply watermarks to individual photos or batches, plus easily adjust size, rotation angle, position, transparency and more.

**NEW! Blemish Removal & Correction:** Save time and edit faster by performing more non-destructive, layer-based touchups and corrections directly in AfterShot Pro 3, without exporting your image to a second editor like Photoshop or PaintShop® Pro.

**NEW! In-App Preset Library:** Get access to a library of free and premium photo presets, regularly updated and hand-picked by the Corel Photo Team. Reproduce popular editing looks with the power

of our included presets or apply them as a starting point and adjust to create your own. You can also share your creations with the community.

**NEW! Lens Correction Development Kit:** Get ahead of the curve by making and sharing your own lens corrections—ideal for photographers working with rare or brand-new glass. Simply follow the lens correction instructions, save your profile, then load it into AfterShot Pro 3.

**NEW! Dynamic & Modular Camera Profile Updates:** AfterShot Pro 3 now has the ability to deliver new and updated RAW profiles faster than ever before. With the modular delivery system, as soon as a new camera profile is created by our development team it's made available for download directly in-app—no more waiting for the next update to support your new camera.

**NEW & ENHANCED! Plugin Development & Download Availability:** The new in-app Plugin Manager finds and installs plugins in a flash. Extend any workflow with free plugins from the community, discover premium plugins (like the popular GradFilter Pro), and get the latest plugin updates all in one convenient place. Plus, plugin-developers can leverage our unique RAW-level plugin API and toolkit to build pro-quality plugins to tap into the full power of AfterShot's processing pipeline.

### Availability

AfterShot Pro 3 is available now for Windows, Mac OS and Linux in English, German and Japanese. Suggested retail pricing is \$79.99 (USD/CAD) and existing registered users can purchase for the upgrade price of \$59.99 (USD/CAD).
