

Corel® AfterShot™ Pro 2.1 Brings HDR to Mac and Linux, Adds Support for 17 Cameras

*Free Update Boosts RAW Camera Support, Delivers Improved Highlight Recovery
and a Variety of Photo Workflow Enhancements*

Ottawa, ON – October 16, 2014 – [Corel's Photo Editing group](#) has released a new update to [AfterShot™ Pro 2](#), the industry's fastest RAW converter and photo management software. Available free to registered users, the 2.1 update introduces a number of new features and enhancements including new HDR tools for Mac and Linux, support for more than 17 new RAW camera profiles, a dramatically improved Highlight Recovery Tool, and performance and stability updates to enrich the overall photo editing and photo workflow experience.

“With the release of AfterShot Pro 2.1, we’re bringing the power of our HDR toolkit to photographers on Mac and Linux. The improved Highlight Recovery in 2.1 enhances our customers’ abilities to recover detail and highlights in RAW images—one of the key benefits of shooting RAW. Across the board, we know all our professional and enthusiast photographers will see great benefits from these new tools, extensive list of new camera profiles and performance enhancements ” said Greg Wood, Senior Product Director for Corel’s Photo Editing group. “Customer feedback has been the driving force behind these new features. 2.1 is just the latest step in our commitment to deliver continuous, user-focused updates for AfterShot Pro to enable our users to create their best photos ever.”

New and Improved Features in AfterShot Pro 2.1

- **NEW! AfterShot HDR for Mac and Linux**
- **NEW! Camera Profile Update:** In addition to the 15+ camera profiles already added since the launch of AfterShot Pro 2 earlier this year, 2.1 brings new support for 17 new cameras including:
 - Canon SX50 HS
 - Fujifilm X-T1, X-E1, X-E2, X-Pro1, X-M1, X100S and X20
 - Nikon D4s, D3300, 1 V3, 1 J4, Coolpix P330 and Coolpix A
 - Pentax K-500, 645Z, Q
- **Expanded Highlight Recovery Capabilities:** Now dramatically improved, Highlight Recovery makes it simple to correct and recover overexposed areas of a RAW photo
- **Enhanced User Experience:** Thumbnail improvements, increased OpenCL 2.0 performance, and an updated application desktop icon, along with many more performance enhancements under the hood.
