

## **WinZip® Courier™ 4 Delivers Fast and Secure Zip Email Attachments**

*Provides Seamless Integration with Corporate Email and ZipSend™ Web Service*

**Maidenhead, UK – Wednesday 25 July, 2012 – [WinZip Computing](#)**, a Corel Company, today announced WinZip® Courier™ 4.0, the latest version of its email plugin software that integrates with email applications and the WinZip [ZipSend](#)™ cloud-based delivery service to automatically zip, secure and deliver attachments up to 2 gigabytes. Effortless to use and easily managed by IT departments, [WinZip Courier](#) 4 saves companies time and storage space while securely sending files through e-mail servers or the cloud.

WinZip Courier 4 works with Microsoft Outlook 2003, 2007, 2010 (32-bit and 64-bit) and webmail, including Yahoo! Mail, Hotmail and Gmail to zip attachments into smaller, manageable packages that are delivered faster without issues. Users can password-protect outgoing files containing confidential data with 128-bit or 256-bit AES encryption. In addition, WinZip Courier 4 wipes temp files to ensure the security of encrypted attachments.

When working with large files that exceed email size limits, WinZip Courier 4 can seamlessly connect to ZipSend, making it simple for anyone to send files up to 2 gigabytes directly from their email without requiring them to change the way they work. Available in 13 languages, WinZip Courier 4 is ideal for organisations of any size from small businesses to large global companies. With support for Microsoft Installer (MSI) technology, WinZip Courier 4 can be quickly deployed over corporate networks.

### **New in WinZip Courier 4.0**

- **Full 64-bit support:** Designed for 32-bit and 64-bit systems, including both versions of Microsoft Office and Microsoft Outlook, WinZip Courier 4 is the right choice for computing environments that employ both older and newer machines.
- **Background file upload:** When using Microsoft Outlook to send large files through ZipSend, WinZip Courier 4 allows users to send the email and continue working, uploading files in the background and automatically sending the outgoing email when the upload is finished.
- **Faster zip technology:** With a new Zip engine under the hood, WinZip Courier 4 provides smoother integration with email processes. Users can zip and deliver email attachments faster than ever before.

- **Extended language support:** Ideal for multilingual work environments, WinZip Courier 4 is available in 13 languages including Brazilian Portuguese, Chinese Simplified, Chinese Traditional, Czech, Dutch, English, French, German, Italian, Japanese, Korean, Russian and Spanish.

“WinZip Courier 4 is the easiest way to take advantage of the power of Zip file compression and encryption through your personal webmail and business email accounts. Users can simply attach, protect and send their files, while in corporate settings, IT is relieved of the headaches of keeping information secure and bandwidth under control,” said Patrick Nichols, President of WinZip Computing. “Companies turn to WinZip because we offer products built to meet the needs of the enterprise, including network deployable software and applications available for all of today’s most popular platforms and devices.”

### **Availability**

WinZip Courier 4.0 is available now through [www.winzip.com](http://www.winzip.com) for purchase or a [free trial](#). Discounted volume licenses are available. Individual pricing starts at £20.82 (excluding) VAT. WinZip Courier 4.0 works with Microsoft Outlook 2003, 2007, 2010 (32-bit and 64-bit versions) as well as Google Chrome, Mozilla Firefox and IE for use with Gmail, Hotmail and Yahoo! Mail.
