

Capturing ideas with Corel Grafigo on stylistic Tablet PC

Corel and Fujitsu Siemens Computers complement each other worldwide

London, March 26, 2003. Corel Corporation (NASDAQ:CORL, TSX: COR) and Fujitsu Siemens Computers have announced a partnership designed to make working-on-the-go easier. From April this year, Fujitsu Siemens Computers will deliver its new Tablet PC Stylistic ST4000 with Corel Grafigo, an application specifically designed for the Microsoft® Windows® XP Tablet PC Edition operating system. By pre-installing Corel Grafigo on its Tablet PCs, Fujitsu Siemens Computers will give users immediate access to the powerful sketching, annotation and graphics tools of this application, without the need for a mouse or keyboard. Users already working with a Tablet PC can download Corel Grafigo at no cost from Corel's Web site (www.corel.com/grafigo).

Developed to meet the needs of mobile professionals, Corel Grafigo allows users to quickly create and share 'on the go' sketches, drawings or schemas with their colleagues. Featuring the latest processor and display technology, this new Tablet PC provides the ideal tools with which to take full advantage of the functionality within Corel Grafigo. In particular, its specially designed digitised interface allows users to closely control the pen input.

The pen control provides the complete range of options required by mobile PC users: handwriting recognition easily converts scripts into fully editable texts. With shape recognition functionality, rough ideas and sketches can be automatically converted into precise graphics and by taking advantage of the Onionskin feature, users can annotate documents and images or provide feedback on underlays.

"With the new Stylistic ST4000 Tablet PC series, we are addressing the needs of people who are often on the road but require flexibility while at their desk," says Louis Jouanny, Vice-President marketing and strategic developments of the Mobile Pen PC Business Unit at Fujitsu Siemens Computers. "Corel Grafigo is the ideal complement to the PC Stylistic ST4000 series. Fujitsu Siemens Computers stands for quality, creativity and reliability – three attributes which also apply to Corel Grafigo."

"To be creative whilst on the move is a statement which has been seen, until recently, as a contradiction in terms," added Brett Denly, vice-president of marketing EMEA at Corel. "With Corel Grafigo pre-installed, Fujitsu Siemens Computers Tablet PC's will make it easier for business users to work 'on the go' and to be more productive."
