

CREATIVE INTELLIGENCE

Ulead® Photo Express® 6

The Fast Track to Photo Fun

What's New

Ulead® Photo Express® 6 is home photo creativity software that makes it easy to edit and share digital photos and create fun photo projects. Edit and enhance images, browse your photo collection and express your creativity with stunning special effects and creative photo projects. Ulead Photo Express puts you on the fast track to photo fun!

Quick Task Launcher

Now you have a central point to start all your projects. Whether you want to **import** photos from a camera, scanner or camcorder, **browse** your photo collection, **edit** or enhance photos or **create** a card, calendar, photo album or other fun photo project, the **Quick Task Launcher** gets you on track fast.

Step-by-step Workflow

Photo Express keeps you on track by showing you available options in the top level task bar. Photo projects are organized into easy steps that guide you from start to finish.

Projects - All Together Now

Photo Express has always been great for creating fun photo projects. Now we've grouped all of Photo Express's different projects into a single menu called "Create." The new "Create" menu is available in both Browse and Edit modes for easy access and includes options to make **Cards, Photo Albums, Calendars, Slideshows, Wallpaper, Mobile Images, Mobile Animations**, four types of **Web** projects and three exciting **Animated GIF** projects.

Photo Albums

Multi-page Photo Albums are the perfect way to show off sets of photos. Choose from a variety of themes in landscape, portrait or scrapbook orientation. Present your photos in groups of one to four photos per page. Complete your Photo Album with text, props, a personal signature and more! Your photos will love their new home.

Even More Projects

Photo Express 6 gives you even more fun projects for your photos*. Use your photos to create **Mobile Images, Mobile Animations, Web Pages** and **Animated GIFs**.

- **Mobile Images** let you convert your photos to show on your phone or mobile device. Get just the right size photo in the format your phone needs!
- **Mobile Animations** let you add fun animated objects to photos to create animations to use on your phone or other mobile devices. It's easy and fast.
- Four different **Web** projects are available. **Web Pages** feature a single photo and background music, **Web Albums** for multiple photos, **Web Cards** combining photos, video and audio and **Web Shows** that presenting slideshows with audio.
- Three new **Animate GIF** projects let you turn your photos into fantastic motion **Kaleidoscope** effects, add blazing **Fireworks**, or turn photos into a spinning **Magic Cube**.

CREATIVE INTELLIGENCE

Props!*

When you want to say "Cute as a Button," use a real button! Your photos will say more with callouts, symbols, party favors and many other fun objects you can add as props. Add one or many. Place props anywhere on your photo and reposition them anytime. Rotate and resize your props for a perfect fit.

Filmstrip Browse Mode

New Filmstrip browse mode joins Thumbnail and List modes as a third way to browse photos on your computer. In Filmstrip mode, photos in the current folder appear as thumbnails at the bottom of the screen with the selected photo displayed in the workspace. Quickly step through your shots to find just the right one.

Full Screen Browse Mode

See your photos full screen. It's easy to get a good look at your photos or create instant slideshows to show off your pictures.

MPEG-2 Playback

Photo Express lets you browse and enjoy more than just photos. In Thumbnail and List browse modes you can view and play back audio and video files using the built-in media player. Now Photo Express 6 lets you play high quality MPEG-2 video.

Larger Filmstrip

The filmstrip at the bottom of the screen shows all the photos you have open for editing or fun photo projects. Now the filmstrip shows larger thumbnails so it's easier to find the photo you want. For even more editing space, you can now show and hide the filmstrip at the touch of a button.

Customizable Skins

The Change Skin command, found in the Global Task bar, now lets you directly choose an image on your computer to use as the background for your workspace.

Two-sided Printing

When you select multiple image files in Browse mode or when printing Photo Albums, you now have the option to print on both sides of the page with printers that support duplex printing.

* Props and Web and Animated GIF projects previously available in Photo Express 4 Digital Studio Edition.
