

New CorelDRAW® Technical Suite X7: A Powerful Technical Communication Solution

Suite Features Tools that Allow Users to Envision, Illustrate and Communicate Effectively

OTTAWA – March 17, 2015 – Corel today released CorelDRAW® Technical Suite X7, its latest solution for technical communication professionals. With new 3D PDF publishing capabilities, connectivity to Translation Memory Systems (TMS) and a redesigned user interface, this new version gives companies the ability to increase ROI on their CAD system investments by repurposing CAD and 3D data for technical illustration and visual communication workflows.

CorelDRAW Technical Suite X7 features Corel DESIGNER® for dedicated technical design and illustration, including advanced isometric drawing tools, leading file compatibility, and publishing capabilities for print, online and mobile. The program helps technical communication professionals create projects quickly by accessing and repurposing technical design assets from various sources. The advanced Lattice3D Studio CAD add-on supports 3D CAD assembly formats from CATIA, Inventor, NX, PTC Creo, SolidWorks and others. With file export capabilities covering graphics, bitmap and other document formats, from Microsoft Office, CGM, SVG, EPS, TIFF, JPEG and PNG to PDF/A and S1000D industry standards, CorelDRAW Technical Suite X7 allows users to distribute technical communications to a variety of media publishing options.

“With CorelDRAW Technical Suite X7, we want to help technical communication professionals enhance their workflow and productivity as much as possible,” said Klaus Vossen, Senior Product Manager for CorelDRAW Technical Suite, Corel. “Together with Lattice3D Studio CAD Corel Edition, the latest version of CorelDRAW Technical Suite offers tools to help streamline the workflow from 3D design to technical communication. By allowing users to repurpose 3D CAD data to efficiently create high-quality technical communications, and update their deliverables from modified 3D CAD sources, the program helps resolve bottlenecks in the technical publication workflow.”
